

More Testimonials...

I started my business 3 years ago as a web based venture and an idea. I didn't know the first thing about building a web page or even how I would want it to look. When I spoke to Bizz WebSolutions about building a web site for my business I knew that I had found the right company for the job. The price was great and the support is phenomenal....bar none. I want to thank you for all your support and for really helping me get my web site and web based business off the ground. You had my page online in a couple of days and you listened to exactly how I wanted it to look. I get calls from all over the United States and they comment on how well they like the website. I couldn't have done it without you. Thank You So Much Bizz WebSolutions!

**Jared Northey, Owner, RCMobility.com
RampConnection.com, CargoRail.com**

As a small business owner, I didn't know that it was so important to have my store open 24 hours a day, 365 days a year. I also thought my market was only Cartersville, GA and the surrounding area. That was before I met Steve Pelfrey from Bizz WebSolutions. He explained to me how a professionally designed website could bring potential customers. At first I was reluctant. I thought, "I don't need a website." But I decided to give Bizz WebSolutions a chance, and I am so glad I did! Steve set us up with a great marketing plan, and trained us on the editing and upkeep of the site at our office location. Our sales tripled in the first month. Our customer base now ranges from Texas to Michigan to Florida and all over the Southeast. Thank you Bizz WebSolutions for what you have done for our company!

Customer Testimonial...

I am a partner of S & W Equine Specialists, an internet based horsetrailer dealership. Bizz WebSolutions built my website and trained me to make all of my own changes as needed. It has been a great tool, in every way. Bizz WebSolutions made everything easy and very workable. In a little over a year we have had approx 49,000 hits. Steve showed me how to get the most out of my website with different programs, search engines, keywords, and submissions lists. He was very patient with me in the learning curve of editing my site. I lost my front page on several occasions and he was right there to repair my mistakes and make it right again. I encourage anyone needing a website to go to Bizz WebSolutions first. They will save you money, time, and a lot of the headaches that come with setting up a website.

Bizz WebSolutions did such a great job on our horsetrailer website above, that I decided to have him build a website for my photography business. He had never built a photo site, but he did tons of research and came up with the brilliant site that I have now. My photography site is very user friendly, very secure, and has all of the easy editing tools. My customers love my site, and in less than 2 months we have had over 1000 hits. The ordering of photo' s from m site has simplified my customers life and mine, from the hustle and bustle of getting to the photographer at the shows. This is what the web is about and Bizz WebSolutions is on top of all the new technology that you can use in your site.
